Experience

Freelance/Self-Employed - Unity Developer **2026 - Present**

- Developed multiplayer prototypes using FishNet
- Designed and implemented core gameplay systems for personal and freelance Unity projects
- Improved runtime performance through profiling and draw call optimization in mobile/WebGL environments
- Integrated real-time motion tracking systems in Unity using MediaPipe models

Commit Apps SRL - Unity Developer & Backend Engineer **2024 - 2026**

Metal Brawlers — real-time multiplayer mobile game (iOS | Android)

- Developed core gameplay systems and full gameplay loop in Unity/C#
- Built server-authoritative multiplayer architecture using FishNet
- Designed and maintained REST API integration with backend services (Go-based server)
- Implemented resilient WebSocket connection handling with automatic reconnection and recovery for unstable mobile networks
- Improved low-end mobile performance from ~10 FPS to stable 60 FPS through profiling and draw-call optimization
- Supported 30+ CCU per session with low-latency state synchronization

Projects

Scroll-Inc
itch.io - https://frostflak.itch.io/scroll-inc
A simple incremental game about doomscrolling

- Implemented the gameplay loop using ECS

zen!
itch.io - https://frostflak.itch.io/zen
Source - https://github.com/FrostFlak/zen-game-jam-plus-2025
Tiny rhythm game made in 48 hours for GameJamPlus 2025

- Handled game design and implemented the full gameplay loop under a 48-hour jam deadline

Chasing the Sunset!
itch.io - https://frostflak.itch.io/chasing-the-sunset
Source - https://github.com/FrostFlak/chasing-the-sunset-gmtk2026

- Designed and implemented the core gameplay and narrative interaction systems during a 96-hour GMTK 2026 game jam.

Skills

Engine & Languages: Unity, C#, OOP, ECS, VContainer, UniTask
Multiplayer & Networking: FishNet, Photon, Server-Authoritative architecture
Systems: Unity Editor, Addressables, DoTween, Profiling, SDK Integration
Backend: Go, .NET, PostgreSQL, SQL, REST API, WebSocket
DevOps: Docker, CI/CD, Git, GitHub

Education

Free International University of Moldova (ULIM) **2024 - Present**
Information Technology

ULIM College **2020 - 2024**
Programming and Analysis of Software Products

Languages

- English (Intermediate)
- Romanian (Native/Bilingual)
- Russian (Native/Bilingual)
